

An experiment to empower humans.

Created on Solana.

Operated across chains.

Preparing for Web 3 domination.

@SoliensNFT

The Solien's (Not so) Secret Society – White Paper v3.0 – 9/1/21

The Solien's (Not so) Secret Society, or **SNSSS** a user-governed community of individuals who want to push the boundaries of what an NFT community can collectively accomplish. **Plain and simple.** Many of us also happen to be fervent believers in advancing the study of the unknown, particularly as it relates to the potential reality of life in the universe beyond earth. We'll unlock value sitting dormant at the confluence of Crypto and UAP culture by providing an incentive plan that allows all interested parties to greatly benefit.

SNSSS represents the human drive to explore the unknown by collaborating, adapting, and overcoming obstacles in the search for truth. We're born as explorers, and this collection aims to revitalize the curious child that lives inside us. The mechanisms in this project were carefully designed to incentivize holding, trading, and community involvement among NFT token holders. By leveraging the Solana blockchain we can guarantee low gas fees, instant transfers, and a user-friendly secondary marketplace. By forming a DAO, we can unlock revenue generating (DeFi) opportunities for holders since the capital requirements to purchase many high-potential NFTs is out of reach for most.

Background

*The Solien's (Not so) Secret Society was formed to generate a collective consciousness within humanity in the form of a **Decentralized Autonomous Organization (DAO)** that allows decentralized decision making in order to establish long term value across multiple blockchains – especially Solana – while simultaneously funding underappreciated ET research at The Galileo Project. (<https://projects.iq.harvard.edu/galileo/home>)*

*This NFT project creates a unique financial vehicle that allows the community members access to benefits in each stage of development, while also supporting the creation of a robust micro-economy by delegating control of metaverse assets (or other crypto assets) to a democratic governing DAO body. **(See DAO doc for more info)***

In 2021, key members of the Solien's (Not so) Secret Society have gotten hold of leaked mugshot images from government facilities where a rare, blockchain-based ET species, the Soliens, are being held. In true Solien spirit, they decided to utilize the power of the Solana platform to transfer economic energy towards the community, as well as the advancement of our beloved UAP subject. This is our chance to let the world know that Soliens exist and are actively involved in our affairs. #FreeET

Note on Structural DAO Limitations

Currently, there are no live platforms for a Decentralized Autonomous Organization (DAO) that can exist completely within the Solana ecosystem. This does not mean there never will be, just not for the next month or so. Regardless, it does mean that in order to start making use of our collective consciousness in the present moment (without sacrificing centralization) we must operate within another ecosystem. I can smell the fear of gas fees already- but fear not Solien for there are solutions! Soon we will drop a file into the #whitepaper channel with details on how the DAO will operate. We want to hear from the community to see what structure they feel gives them the most assurance that they'll be able to govern within the DAO in a way that is fair, effective, and easy.

DAO DOC:

https://drive.google.com/file/d/1DW5bNEvac_YkWqRSSneY_Id5lj0j25MC/view?usp=sharing

Project Phases

Phase 0: Community Building (8/20/21~Pre Launch)

- **Key Goal:** Surpass 5,000 Discord members and 5,000 Twitter followers
- **Key Event:** Airdrop @ 500 on discord – POAP Redeemable for 1 Stardust in Phases 3 and 4
- **Additional Goal:** Implement Pre-Launch (only) auction system that allows for a fair distribution of NFTs (Since pre-launch is only for 500 NFTs we want to get as close to 500 unique owners as possible)

Phase 1: Community Pre-Launch (1st Week in Sept)

- **Key Goal:** Create Community Fund focused on leveraging growing interest in Solana
- **Key Event:** Early Adopters Sale
 - 500 of 10,101 SNSSS NFTs to mint starting at 2 SOL each w/ 1 NFT max per bidding wallet. Each NFT owner will be airdropped a Solien at main mint
 - Bidding starts at 2 SOL
 - Top 50 bids get mints #1-50
 - Gold token NFT worth 15 Stardust
 - The NEXT HIGHEST 150 bids get mints #51-200
 - Silver token NFT worth 3 Stardust
 - The NEXT (aka LOWEST) 300 bids get mints #201-500
 - Bronze token NFT worth 1 Stardust
 - ALL Pre-Launch tokens will be high-fidelity 3D/AR compatible files
- **Instant Impact:** Donating significant funds to The Galileo Project off the bat!
- **Positive Feedback:** Community Dev Fund to start compounding metaverse benefits
 - \$POLIS/ \$ATLAS yield farming has the potential to provide substantial rewards
 - PseudoDAO can act as a large member of other DAOs (e.g. GrapeDAO)

- This gives YOU **access, revenue, and opportunities.**

- **How will the auction work?**

- o 500 out of 500 collectible 3D/AR NFT coins will be auctioned off
- o Only 1 coin can be allocated to 1 wallet per auction
- o This was because of a few reasons:
 - To ensure whales do not monopolize the supply
 - Maximizes exclusivity of each tiered coin.
 - Incentivize bidding at all levels
- o The 500 coins are then divided into 3 tiered versions.
 - Gold, supply = 50
 - Silver, supply = 150
 - Bronze, supply = 300
 - Total supply = 500

- **What can I do with any of these 500 coins?**

- o The Bronze token is redeemable for 1 Stardust
- o The Silver token is redeemable for 3 Stardust
- o The Gold token is redeemable for 15 Stardust
 - “PseudoDAO” vote mechanism matches Stardust level
 - 3 Stardust to submit proposal (can be collective proposals)
 - 3 Types of proposals to submit
 - o Funding: How much Stardust to sell and what price for DAO entry? (Not relevant until Phase 3+)
 - o Finance: What to buy? How much?
 - o Governance: What new regulations/ standards to set?
- o You can sell your coin on DigitalEyes anytime before main launch
 - Loses access to Discord governance mechanisms if sold (See DAO doc)
- o You may be able to sell your coin for its worth in terms of % share in DAO fund once we reach Phase 3 (Share of Stardust Supply in Dollars = Buyback Value)
- o The Thesis revolves around combining staking of metaverse coins, purchasing NFTs with utility (such as Star Atlas NFTs yielding in-game assets), and investing in other projects (think ZED run, passive revenue generation) to profit. We will also purchase large membership stakes in key DAOs in order to compound benefits that are scaled up with

position size, and grow our community by appointing delegates to vote on our behalf. DAO membership allows us to form **multiple avenues for passive income**, which perpetuates the growth of the DAO. **All while supporting real ET research.**

- **IMPORTANT:**

- o All wallets with 3D Coin NFTs from Pre-Launch will be awarded a Solien

- Different NFT type to the coin but is, subsequently, the type all remaining NFT tokens will be.
 - If the Solien is rare, they also increase your Stardust allocation
 - Soliens airdropped to holder's wallet on day of Main Launch

- **We will be posting an example path of an actor through a dummy auction (Coming soon to Discord!)**

- o i.e. We want to make this process as clear and easy as possible for you. From the user experience side.
 - o So we're going to show you step by step, how an example auction will be run.
 - o We encourage you to familiarize yourself with this document (once released) prior to the pre-sale
 - o We encourage you to ask questions for us to compile a comprehensive FAQ

- **So what's next?**

- o Upon conclusion of Phase1, the community's pooled assets will be managed in the form of a "PseudoDAO" through Discord NFT validation protocols
 - Entry to the pseudo DAO Server will be permitted using Grapetech.ae protocol.
 - Grapetech protocol allows for the autonomous assignment of roles based on the number of Stardust owned.
 - o After that, we will then transition to Phase 2 and 3, which is when the minting of Stardust will occur in a tokenized DAO system

- **Side note: You Soliens are machines**

- o The project is DIRECTLY being accelerated by every comment, server invites, reactions, reply, meme posted. Just ya know, vibing alien stuff, and thanks to that, you're all MANIFESTING a collective goal shared among (now 1.46k!) consciousness from **all corners of planet Earth!**
 - o Seriously, thank you for everything! We're so early in this space, there's no imagining how successful we can be after a few months, let alone the years leading up to the AAA Solana Metaverse in Star Atlas.

- o I hope you will all be proud to show off your Soliens and know that **you are manifesting prosperity for all community members** by being active, staying true to the mission, and supporting our collective exploration of the unknown.

Pre-Launch Mint Funds Allocation:

Allocation	Percentage	Note
DAO Fund	60%	<ul style="list-style-type: none"> • Staking ATLAS/POLIS for yield • Purchasing revenue-generating assets
The Galileo Project	10%	<ul style="list-style-type: none"> • 100% funds go towards constructing AI powered camera-telescope systems in order to better understand UAP • https://projects.iq.harvard.edu/galileo/home
Development Team	20%	<ul style="list-style-type: none"> • Funds to go towards hiring additional developers for Phase 2 and beyond
Marketing and Strategy Team	10%	<ul style="list-style-type: none"> • Funds to go towards paying our amazing Graphics and Strategy teams

10% Royalty Funds Allocation:

Allocation	Percentage Royalty on Sale	Note
The Galileo Project	5%	<ul style="list-style-type: none"> • See above
Phase 1 Reward Fund	3%	<ul style="list-style-type: none"> • 100% of Royalties Accrued under this account will go to a lucky SNSSS holder (More details in appendix)
Development Team	2%	<ul style="list-style-type: none"> • Payment for maintenance

Phase 2: Ramp-up to Main Launch (Soon after Pre-Launch)

- **Key Goal:** Generate hype, run twitter giveaways, finalize DAO architecture, implement partnership structures, create massive DAO FOMO
 - o Migrate DAO to Solana if possible at this time
 - o Else plan migration to ETH based platform upon Main Launch if needed
- **Key Event:** Launch of generative artwork, graphic themes, final website, and more giveaways.
 - o Trading for NFTs available on DigitalEyes
- **Community Building Goal:** Flesh out best practices for DAO activities through “Pseudo DAO”, and provide space for debate on how to utilize assets and multiply Stardust holder’s share value. Make a LOT of money in NFTs by the time we launch. (See DAO doc)

Phase 3: Main Launch (TBD ~ 9/4/21)

- **Key Goal:** Begin version 2 DAO governance model
- **Key Event:** Minting of remaining 9,601 SNSSS tokens and DAO governing mechanism
 - **9,500 SNSS tokens to mint at 4 SOL each, token TX max TBD**
 - **5,619 Stardust** will go to SNSSS holders with **Ultra-Rare** attributes (see below)
 - **101 SNSS tokens** to be used for twitter/discord giveaways
- **Additional Event:** Phase 1 Reward Fund released to “The Golden Sign” (see below)
- **Community Building Goal:** Flesh out documentation on governance structures, decide if we want to reward **final 500 Stardust in supply** to key community members/ partners
 - **5,619 to 6,119 total Stardust will be in circulation for DAO launch**
 - **5,619 from SNSS NFT drop**
 - **500 POAPs let Solien NFT owners +1 their Stardust allocation (~300-500 expected)**
 - **Final stardust count to be determined post-mint**

Main Mint Funds Allocation:

Allocation	Percentage	Note
DAO Fund	60%	<ul style="list-style-type: none">• Exact uses of DAO Fund will be determined by Stardust holders, but some options are to stake \$ATLAS and \$POLIS LPs while also collecting Star Atlas NFTs to farm yields, but the reality is that DAO gets to do what DAO wants to do• https://raydium.medium.com/star-atlas-is-launching-on-acceleraytor-fa35cfe3291f• DAO system lets us automate this
The Galileo Project	10%	<ul style="list-style-type: none">• 100% funds go towards constructing AI powered camera-telescope systems in order to better understand UAP• https://projects.iq.harvard.edu/galileo/home
Development Team	20%	<ul style="list-style-type: none">• Our Phase 2 Dev team will likely be made of more experienced developers, and their cut will reflect the added value
Marketing and Strategy Team	10%	<ul style="list-style-type: none">• Funds to go towards paying our amazing Graphics and Strategy teams

10% Royalty Funds Allocation at launch:

Allocation	Percentage Royalty on Sale	Note
DAO Fund	5%	<ul style="list-style-type: none">• See above
The Galileo Project	3%	<ul style="list-style-type: none">• See above
Development Team	2%	<ul style="list-style-type: none">• Payment for maintenance

Phase 4: DAO Governance Prior to Metaverse Launch (Phase 2 – Star Atlas Release Date?)

- **Key Goal:** Potentially partially self-operate as a future Star Atlas Nation, the Nation of Galileo, alternatively the DAO can decide to allocate funds to the leading metaverse contender of the time, if not Star Atlas, or even any other venture they create consensus on.
 - DAO will be governed by holders of **Stardust** and exists in the context of investing in a future Solana ecosystem. Funds can go towards the Star Atlas metaverse in \$POLIS, \$ATLAS, or NFTs that yield in-game Land, Licenses, Contracts, etc. **The community can also decide to take alternative paths.**
 - You can also sell your **Stardust** bearing SNSSS and cash out if you wish.
 - We are in conversation with the very first Star Atlas DAC to ever exist – the Interstellar Alliance – in order to have our DAO have a stake in this body as a sovereign nation
 - Important Links for Context:
 - <https://staratlas.com/files/star-atlas-white-paper.pdf>
 - <https://staratlas.com/files/star-atlas-economics-paper.pdf>
 - <https://interstellaralliance-1.gitbook.io/isa/>
- **Key Events:** DAO will continue allocating funds to projects or yield farms based on rules set by holders of governing tokens.

Phase 5: Metaverse Integration and Unbounded Rewards (Star Atlas Release Date -)

- **Key Goal:** Provide utility across all token holders by providing economic utility through game mechanics dependent on DAO Fund resources which were invested months ago.
 - Funds can be distributed to provide subsidies for business creation, Land, Licenses, Contracts, however DAO decides
 - Profit yielded from \$ATLAS and \$POLIS staking will be distributed across token holders according to DAO decisions
 - Highly dependent on future developments of Star Atlas & direction taken by DAO

- **Key Events:** By this point we will have greatly supported the Galileo Project! I really think we will see data never available to the public through this project. Every chunk of \$50,000 we send directly builds a state-of-the-art UAP detection system – the more systems in existence the greater odds we have at capturing UAP data from **multiple detector systems** in a public and verifiable manner. I have no doubt we could move the needle on their scale of operations if we wanted. **The possibilities are endless.**

CURRENT NEXT STEPS:

- In order to make sure everybody is on the same page, feel free to ask a question in our #support channel on discord so that we can create a clear and concise FAQ.
- **Get hyped from art reveals!**
- Dropping website soon, finalizing tweaks for marketplace
- Determining specific details for partnership with larger metaverse universe through Community Funds (Our future DAO can hold a stake in current DAOs such as GrapeDAO and UBERHaus)
- Begin contests/ giveaways at large scale to build following
- PRE LAUNCH!!!

Appendix: NFT Attribute & Rarity Trait Overview (Not-exhaustive)

There are (9) attributes with (36) total rarity levels in the SNSS Mug Shot Collection. Final list to be uploaded to website ~5 days prior to main launch.

- Each of the 10,101 SNSSS tokens will include a mugshot sign, of which 1 will be golden
 - a. The Golden Sign holder is eligible to claim 100% of the **Phase 1 Rewards Fund**
 - b. The Golden Sign also allocates **15 Stardust** to its holder
- **Stardust** allotment will be determined by presence of **Ultra-Rare** attributes, as seen below
- Backgrounds (4 Rarities)
 - a. **4,500** Human Mugshot Room
 - b. **3,000** Extraterrestrial Mugshot Room
 - c. **2,500** Interrogation Room
 - d. **101** **Ethereal background** – **2 Stardust**
- Skins (9 Rarities)
 - a. **3,000** Gray
 - b. **2,500** Green
 - c. **1,500** Blue
 - d. **1,000** Purple
 - e. **1,000** White
 - f. **500** **Pink** – **1 Stardust**

- g. **500 Cyan** – **1 Stardust**
 - h. **51 Gold** – **3 Stardust**
 - i. **50 Confetti** – **3 Stardust**
- Eyes – Pupil/Iris (8 Rarities)
 - a. **3,101 Black/Black**
 - b. **2,000 Red/Black**
 - c. **2,000 Orange/Black**
 - d. **2,000 Blue/Black**
 - e. **300 Black/White**
 - f. **300 Blue/White**
 - g. **300 Orange/White**
 - h. **100 Red/White**
- Jumpsuits (5 Rarities)
 - a. **3,000 Orange**
 - b. **2,500 None - White Tank Top Only**
 - c. **2,500 Tan/Sand**
 - d. **2,000 Black and White**
 - e. **101 Carbon-Based, Skin-Tight Poly-Suit** – **2 Stardust**
- Jumpsuit Patches (4 Rarities)
 - a. **3,000 A52**
 - b. **3,000 Roswell**
 - c. **2,000 A51**
 - d. **2,000 Solana Patch** – **1 Stardust**
- Mouth (2 Rarities)
 - a. **9,213 Nothing**
 - b. **888 CEN\$ORED Tape over mouth** – **1 Stardust**
- Headwear (2 Rarities)
 - a. **5,654 Nothing**
 - b. **3,344 Courtyard Beanie** - (5 colors – R/G/B/Y/P)
 - c. **1000 Rimmed Glasses** – **1 Stardust**
 - d. **100 Aviators** – **2 Stardust**
 - e. **100 3D Glasses** – **2 Stardust**
 - f. **3 XxxTentacion mugshot Style half/half hair** – **3 Stardust**
- Mugshot Sign (2 Rarities)
 - a. **10,100 Black**
 - b. **1 Golden** – **15 Stardust**
- Mugshot Sign Text (1 Rarity – many versions)
 - a. Too many witty, sarcastic, cringey, or serious phrases to list in one page.

Okay, Dude. That Was A Lot – I Don't Even Know What A White Paper Is – What's The Big Idea?

I'm glad you asked. We want to really explore this idea of "can you create a sustainable ecosystem" out of NFTs – and the only path forward is to meticulously plan alongside the community, take this step by step, and bet on decentralization. This is only v3.0 – updated versions will be uploaded to discord directly for download.

Obviously, we want to prioritize user input at every step of the process - and would love to start hearing your thoughts ASAP. Prior to providing feedback, though, please understand that the full transition to Web

3.0 mechanics like DAOs takes time – so keep that in mind when considering this project. Nonetheless, there's still DApps that can use traditional web 2 logins to let users receive a wallet and governance tokens in a manner that can be used to participate in discord with authentication gates based on how much of the token you own for anything from token ownership verification to self-audited governance planning/ execution. **The goal of this project is to empower one another, and drive forward the continual expansion of this ecosystem by creating a community bonded together by their passion for NFTs and Consciousness/The Search for Life. If we help fund the first research project (in human history) to definitely collect data suggesting we are being visited by ET - even better.**

Who Are We?

We as individuals hope to be less important than what our project brings to the collective, and for that reason, the real identities of our core team will remain anonymous – but you should know we're a team of 5 college students with extensive experiences working with memory-based programming languages and won't be launching until we've tested our system rigorously. Identify-verification through trusted community figures can be organized since we are not well known "figures" within the NFT community, but **we are Engineers, Consultants, and Programmers.** Ultimately, we wish to become a small part of a user governed community that has a positive impact on its members and the Solana Ecosystem.

Why Focus DAO Funds on Gaming?

- First, gaming is not the only option for the DAO fund, but a very feasible one we wanted to highlight
- If you access DefiPulse.com it lets you see that the value locked in smart contracts on the Ethereum blockchain has gone from \$1 bn in June 2020 to \$40 bn in March 2021 to around \$80 bn today.
 - If you are on Solana this early, I'm willing to bet you would agree that it is AT LEAST 5% as valuable as Ethereum.
 - Virtual worlds with blockchain-based assets are going to revolutionize the world. The thesis is that combining mainstream AAA game with tradeable primitives will cause the price-per-unit of \$POLIS, a voting token, and \$ATLAS denominated virtual goods to rise. The day that the world acknowledges a digital game's currency holding more value than the USD, for example, will lead to an exponential stage of growth in demand. Currently 1 \$POLIS is around 1/10th of USD... but that may not be the case always.
 - The fact that VRMMORPG tokens such as \$ATLAS and \$POLIS are available and releasing on multiple Solana native DeFi platforms is **deeply** bullish for the future of these tokens as viable economic stores of value **exchangeable for dollars.**
 - **For comparison, M2 – a popular measure of the US dollar money supply – has gone from \$15 trillion to \$20.2 trillion since the pandemic hit in early 2020.**
 - **33% of all USD have been printed in the last 18 months, \$POLIS/ \$ATLAS may have simple monetary policy, but I sure trust it more than the Federal Reserve Notes. Same goes for many NFTs.**
 - **Stardust empowers the individual to vote on how collective funds are allocated to a system we all collectively control and believe in (Solana, blockchain). Whether we invest heavily in the metaverse, other NFT projects, or a mixture of both – ultimately, we are at the very least saving ourselves from the dying currency which is the dollar.**
 - **WAGMI IF WE STICK TOGETHER.**

How will the DAO Operate?

- The governance token of **Stardust** will serve multiple functions in the DAO
 - When a user wants to suggest an action to take, they must stake their **Stardust** (to avoid spam), then the network will be able to stake their **Stardust** in order to vote and approve motions
 - In the “Pseudo DAO” Stardust Coin ownership can be tracked on the blockchain by Discord bots, thanks to GRAPE, and access within discord can be toggled according to ownership, allowing us to create a transparent space for owners to vote + submit proposals. **SEE DAO LITEPAPER FOR MORE INFO**
(https://drive.google.com/file/d/1gUFwXx_sdxzS_ITNJ7u7U5ME7e1sQ2-z/view)
 - The PseudoDAO/DAO will also function as a community, holding a calendar of events and competitions to share loot and support each other's ventures.
 - Founders and advisors to the project will be given **Locked Stardust**, which can only be claimed for its equivalent in dollars after **1 year from mint**
 - This is to ensure that the team is invested in the DAO for longevity & growth
 - Further details on exact % breakdown of Stardust supply to be announced, but >90% of supply will be from NFTs.

Why Is There a Pre-Launch Drop?

- We want to incentivize those that help us grow and believe in the mission early.
- Another benefit is the ability to start investing as a collective, and figure out best practices for DAO.

How Will Pre-Launch work?

- Wave-based auction system, 3 waves, 3 auctions per wave, 3 coin types (see above)
- Begins Friday, Sep 3, 2021 at 8PM UTC
 - **WAVE 1** from Friday 8PM UTC to Saturday 6 AM UTC
 - First, 100 Bronze Tokens will be auctioned for 3 hours
 - Then, 50 Silver Tokens will auction for 3 hours
 - Afterwards, 17 Gold Tokens will auction for 3 hours
 - **WAVE 2** from Saturday 9AM UTC to 7PM UTC
 - Same auction model as above, three three hour auctions one after another
 - **WAVE 3** from Saturday 10PM UTC to Sunday 8 AM UTC
 - Same auction model as above, but 16 Gold Tokens instead of 17
 - **REMINDER**
 - Gold Tokens are worth 10 Stardust
 - Silver Tokens are worth 3 Stardust
 - Bronze Tokens are worth 1 Stardust
 - All Token Holders Receive a Solien NFT prior to main mint of remaining 9,500!

Thank you for your time – hope you like the art – **WAGMI!!**
